

Course Objectives

This Nationally Accredited course is designed for persons who are required to implement the emergency response specified in the workplace emergency procedures or specified by a person at a higher level in the emergency control organisation.

Through the application of theory and practical training, participants will have the necessary knowledge and skills to understand how to raise alarms, initiate basic fire response and undertake safe evacuation in accordance with the site procedures.

Theoretical and practical assessments are conducted throughout the course. Upon successful completion of this course, each student will receive a Statement of Attainment.

Warden Training

Operate as part of an Emergency Control Organisation
PUAFER005
