

Course Objectives

This Nationally Accredited course is designed for persons who may be required to work in areas where they are at risk of a fall.

The course presents a broad range of potential fall risk situations, how to correctly assess & control fall hazards, implementation of safe work procedures, including the selection and use of equipment and the need for a suitable rescue plan.

Successful attendees will be assessed as competent to work at height using suitable fall prevention techniques and fall protection equipment and a certificate issued.

Work Safely At Height

RIIWHS204D

Course Content
